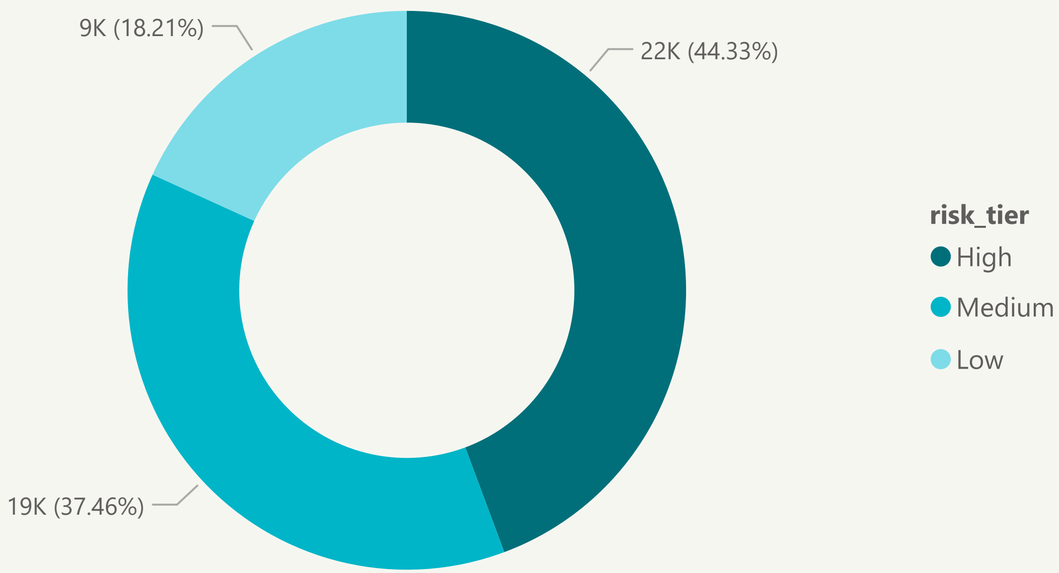
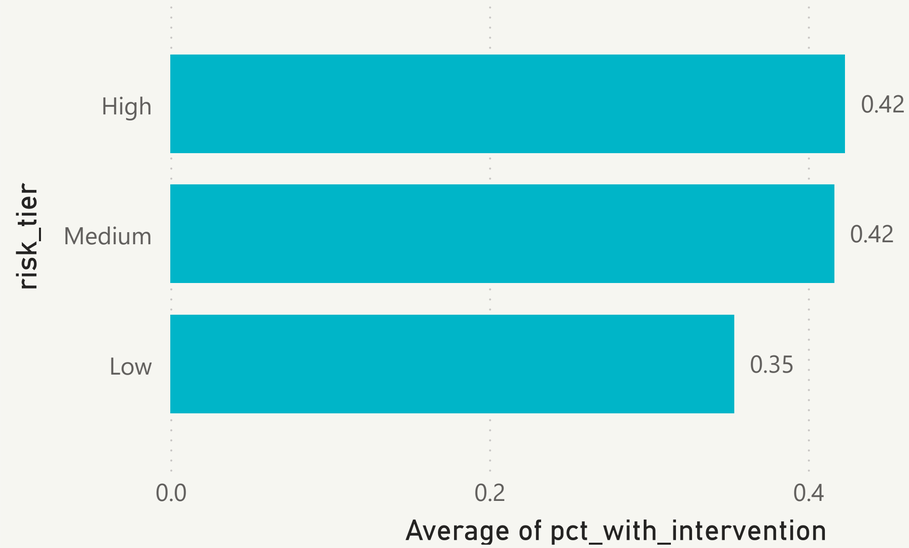
Students by Risk Tier



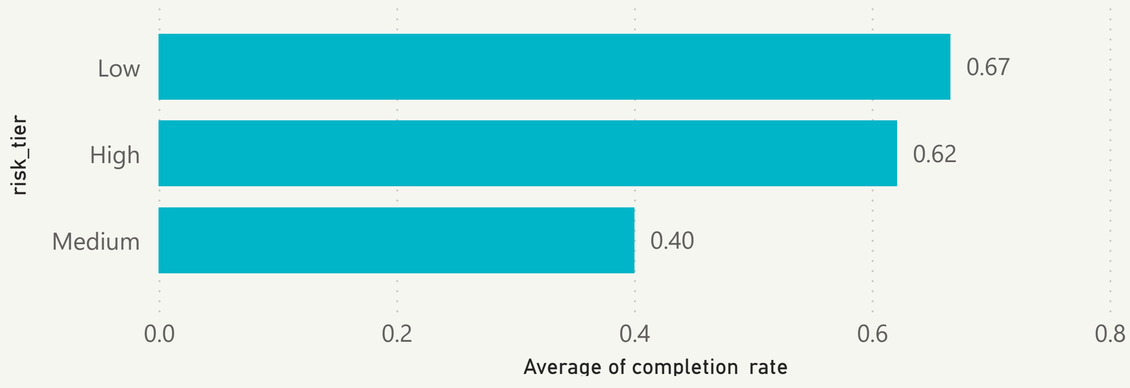
Intervention Coverage by Risk Tier



Higher risk students receive more interventions but coverage gaps remain

44% of students are High risk based on early warning signals

Completion Rate by Risk Tier

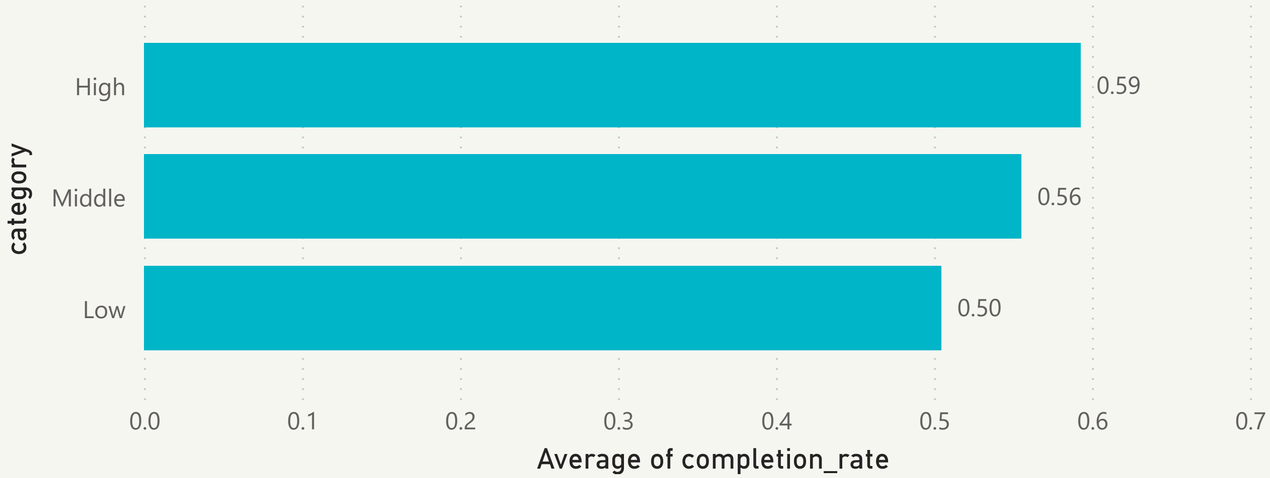


High risk students who received interventions still complete at 62%

22K

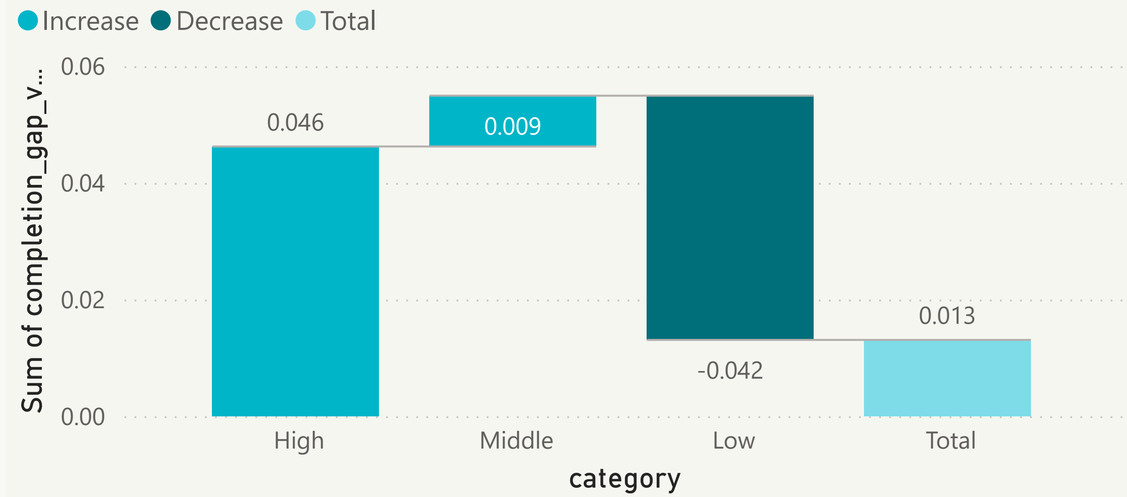
High Risk Students

Completion Rate by Income Bracket



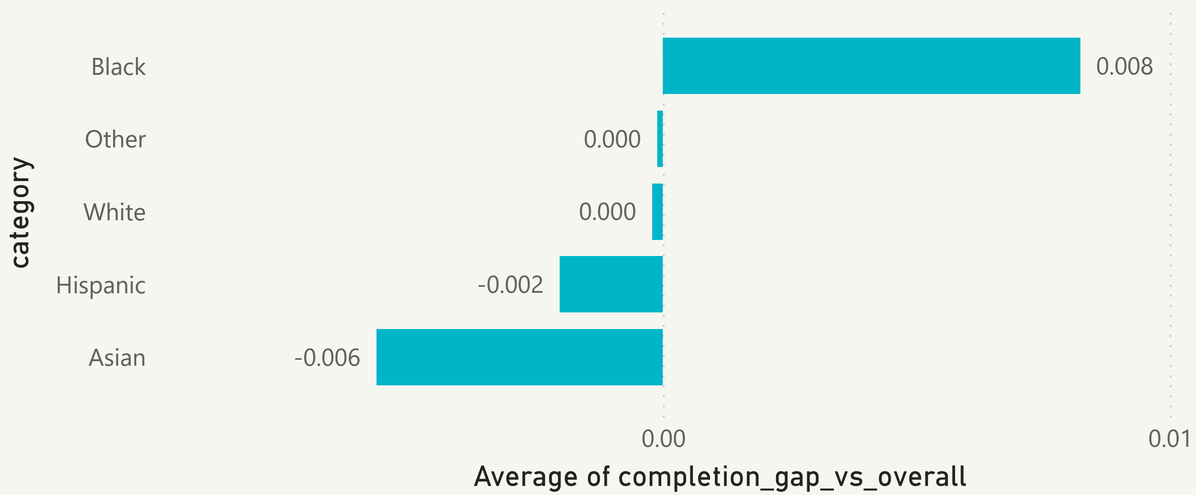
Low income students complete at 50% vs 59% for High income, a 9 point gap directly tied to financial barriers.

Completion Gap vs Overall by Income Bracket



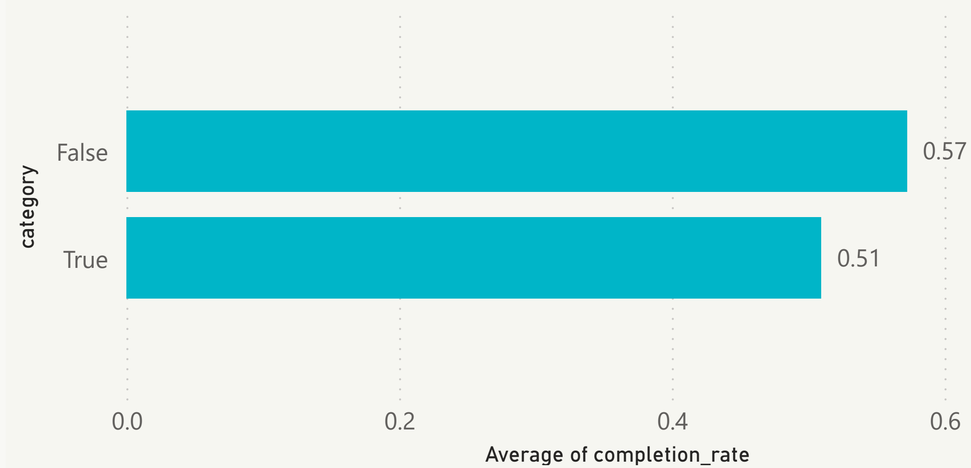
Income bracket is the strongest predictor of both completion and employment outcomes across all student groups.

Completion Gap vs Overall by Race/Ethnicity



Race alone shows minimal completion gap. Income and first-gen status are the true underlying drivers of inequity.

Completion Rate by First-Generation Status



First-generation students complete at 51% vs 57% for continuing-gen, a 6 point gap that compounds into long-term economic disadvantage.
